Date: 4-14-2016

Agency: Town of Pomferet, Vermont

Diamond Mowers Bid Response Supplement for 21' Rear Cradle Boom and John Deere 5100M.

This tractor/boom combination complies with all specifications with the exception of the tractor frame requirement. The 5100M tractor is a modularly constructed tractor with the main subassemblies bolted together. To provide a long lasting and durable solution on this style tractor, Diamond Mowers builds a mainframe/travelrest combination that spans from the front bolster (front axle support structure) to the rear axle. This mainframe starts at the tractor bellhousing, then ties in to the loader mount flanges, and then finally connects again at the rear axle. This methodology distributes the inherent torsional loading associated with boom mowers across these three major structural components, reducing the risk of tractor damage.

72-Hour Parts Shipping Guarantee – We guarantee that your Genuine Diamond Parts orders will ship within 72 hours or we will give you the parts - and the shipping - for free
